

TAMILVANAN

SOFTWARE ENGINEER

PROFILE

Full-stack Software Engineer experienced in Angular and NestJS, building enterprise web applications and REST APIs. Skilled in reusable UI development, database schema design, and performance optimization using Node.js and MySQL. Experienced in debugging production issues and maintaining stable releases across the full application stack.

WORK EXPERIENCE

2026 - PRESENT

Stellar Innovation

Software Engineer

- Designed and developed RESTful backend services using NestJS and MySQL, including performance optimization and production debugging.
- Built scalable Angular modules and reusable UI components, implemented virtual scrolling and optimized change detection to support high-volume data tables.

2025 - 2026

Stellar Innovation

Junior Software Engineer

- Implemented frontend features using Angular, TypeScript, and RxJS with REST API integration and validation handling.
- resolved production defects across frontend and backend modules and supported release stabilization.

2024 - 2025

Stellar Innovation

Junior Software Developer

- Developed Angular components and assisted in integrating backend APIs in a production environment.
- Supported feature enhancements and bug fixes while collaborating with senior developers.

Projects

- ULRS (Universal Loan Review System)
- Ultra-Table Angular Library
- Attendance & Server Management
- Mail Expense Dashboard

EDUCATION

2020 - 2024

- B.E - Bachelor of Engineering - Computer Science and Engineering

SKILLS

Languages

- TypeScript
- JavaScript
- SQL

Frontend

- Angular
- RxJS, NgRx, Angular Signals
- HTML5, CSS3, Tailwind CSS

Backend

- Node.js
- NestJS
- Express.js
- REST API Development
- Authentication (JWT)
- API Performance Optimization

Database & Data Management

- MySQL
- SQLite
- Prisma ORM
- Sequelize ORM
- Database Schema Design

DevOps & Tools

- Git / GitHub / GitLab
- Docker
- Linux Server Management
- Redis (Caching)

AI Tools

- Claude code
- Codex
- Antigravity
- Gemini CLI
